**Fine porcelain surfaces**

Pantheon is now introducing the Profile Series, its latest environmental friendly production. Profile is a 4mm (1/6") thin 100% natural porcelain tile that is light and easy to transport, store, and install. It reduces 30-60% of the consumption of energy, waste, petroleum emissions, and raw materials. Profile is designed to be applied to existing surfaces (can also be used for new construction), which saves customer the expense of demolition and contributes to a healthier environment by becoming a sustainable surface solution.

- Size 20" x 40"
- Dimensional Stability
- Water Absorption  $\leq 0.5\%$
- Meets minimum ASTM breaking strength requirements

- MOHS ratings of 6 to 9
- Frost Resistant
- Stain Resistant
- Resistant to chemical acids and alkalis

- ❖ Profile is the new revolutionary answer to many remodels simply because facilities can now receive a fresh new facelift without the disruption of existing surfaces.
- ❖ Pantheon Complete is the installation system designed to provide the installer with the necessary tools and materials needed for a successful installation. TCNA standards are to be adhered to using standard ceramic tile specifications and recommendations. Unique setting materials and handling guidelines ensure a quality installation.
- ❖ Profile can also be installed using a dry fixed method that allows an immediate and clean installation.
